

Partnering to Help Families

Hoffman Homes is proud to announce a partnership with York/Adams Community Care Behavioral Health (CCBH) to provide enhanced services within their Psychiatric Residential Treatment Facility (PRTF) program. Hoffman Homes will be utilizing one of its nine bed facilities to work with York/Adams adolescent females being referred to their PRTF to provide an increase in services in an effort to reduce length of stays.

Additional services being provided are:

- in home family therapy for the youth and their guardian twice a month
- increase therapy opportunities as caseloads will not be more than five
- transportation to/from a local York/Adams location for weekly home visits
- staff with at least one year's experience in working with trauma

The goal of this program is to increase family engagement and visitation opportunities while also providing services within the home environment. By increasing the frequency of family contact, we hope to address the needs of the family more intensely in order to reunify the youth with their family as soon as possible.
